ing the living

Master of medicine (MMed)

GENERAL OUTLINE

Objectives

Medical studies comprise six years of study grouped into two levels of training.

The Master of Medicine (3 years, 180 ECTS credits) is the second level, following the Bachelor of Medicine (3 years, 180 ECTS credits). The Master of Medicine course is dedicated to the teaching of the theoretical bases of pathologies and the theoretical and practical bases of patient treatment.

This Master's degree is required for admittance to the Swiss Federal Examination in Medicine, which is common to all Swiss faculties of Medicine and is governed by the requirements of the Federal Law on the Medical Professions.

Career prospects

- Clinical Physician
- Research Physician (universities, pharmaceutical industry, etc.)
- Public administrations, international or humanitarian organisations

EDUCATIONAL CONTENT

Description

The course includes periods of training in a clinical environment (teaching with patients, block courses, internships) as well as ex-cathedra courses.

You must also complete a Master's thesis leading to the defence of a dissertation.

Examinations

Evaluation of knowledge – MCQ – open questions on clinical reasoning and QROCs (open short-answer questions).

Evaluation of clinical aptitudes and skills – OSCE (practical examination) during the second year. Report and oral presentation of personal work, including the Master's dissertation.

Mobility

A maximum of 60 ECTS credits can be obtained as part of an exchange programme, in the third year of the Bachelor degree or in the first year of the Master of Medicine course.
